

PPWR (PACKAGING & PACKAGING WASTE REGULATION) COMPLIANCE – ARTICLE 5 OF REGULATION (EU) 2025/40

MITOL, tovarna lepil, d.o.o., Sežana confirms, that our adhesives intended for packaging applications are fully compliant with the requirements set out in Article 5 of Regulation (EU) 2025/40 on packaging and packaging waste (PPWR). The list of products is provided below.

As these products are intended for use in packaging manufacturing (e.g. paper or cardboard bonding, bonding of plastic packaging, etc.), after application they become an integral component of packaging. The adhesive itself is not considered as packaging and **is not subject to an EU Declaration of Conformity under PPWR**. The packaging manufacturer placing the packaging on the EU market remains responsible for compliance of the packaging.

In order to support the packaging manufacturer in preparing technical documentation and conformity declarations, we provide the following information:

- These products are not formulated with:
 - Heavy metals, including aluminium, antimony, arsenic, barium, boron, cadmium, chromium, cobalt, copper, manganese, mercury, lead, nickel, selenium, strontium, tin or zinc;
 - PFAS (per- and polyfluoroalkyl substances) and other fluorinated raw materials;
 - Persistent Organic Pollutants (POP) as per Regulation (EU) 2019/1021.

These substances are not intentionally used in the formulation of these products. Even though we do not routinely check their presence, their amounts are not expected to exceed the limits set out in the Regulation.

- Our products do not intentionally hinder recycling of the primary packaging material.
